

The screenshot shows the Visual Studio Code editor with a file named 'file.html' open. The code is an HTML document for a user registration form. It includes a DOCTYPE declaration, a head section with a UTF-8 charset and a viewport meta tag, and a body section containing a container div. Inside the container, there is an h2 heading 'User Registration', a form with four input fields (Username, Email, Password, and Confirm Password), each with a label and a required attribute, and a 'Register' button. A response message div is also present at the bottom of the form.

```
1 <!DOCTYPE html>
2 <html lang="en">
3 <head>
4   <meta charset="UTF-8">
5   <meta name="viewport" content="width=device-width, initial-scale=1.0">
6   <title>User Registration</title>
7   <link rel="stylesheet" href="style.css">
8 </head>
9 <body>
10  <div class="container">
11    <h2>User Registration</h2>
12    <form id="registrationForm">
13      <label for="username">Username:</label>
14      <input type="text" id="username" name="username" required>
15
16      <label for="email">Email:</label>
17      <input type="email" id="email" name="email" required>
18
19      <label for="password">Password:</label>
20      <input type="password" id="password" name="password" required>
21
22      <label for="password">Confirm Password:</label>
23      <input type="password" id="password" name="password" required>
24
25      <button type="button" id="registerBtn">Register</button>
26    </form>
27
28    <div id="responseMessage"></div>
29  </div>
30
```
